ML Utilities/Cherokee Truck Equipment submitted the lowest responsive bid in the amount of \$297,829.00 and meets all specified requirements. However, the proposed delivery lead time of 12 to 14 months is significantly longer than other bids and could negatively impact operations.

Terex Utilities submitted a bid in the amount of \$311,044.00. Although Terex Utilities is not the lowest bidder and does not meet all of the specified requirements, the differences are considered manageable and are not expected to significantly impact the intended use of the equipment (no tinted glass, no intermittent wipers, and the fuel capacity is 50 gallons instead of 60). Additionally, Terex Utilities has a delivery lead time of only 120 days, which would allow the equipment to be placed into service much sooner and help avoid potential operational disruptions associated with the extended delivery schedule of the lowest bidder.

Based on the operational need for timely delivery and the manageable differences in specifications, staff recommends awarding the contract to Terex Utilities in the amount of \$311,044.00.
